MBE / WBE:	This contract will be awarded in compliance with City Code Chapter 2-9D (Minority-Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this solicitation.			
Additional Backup Information				

This contract is for the purchase of 175 tactical carrier vests for the Austin Police Department (APD). In August 2014, Council approved the purchase of 65 tactical carrier vests. Due to the purchase of the 65 vests, APD Executive Staff has determined this vest will be the approved vest for both the SWAT and Organized Crime Division Units.

The reason for the change in vest earlier this year was because APD needed a new solution that included only one vest to perform both functions. APD wears two different styles of ballistic vests. The first style of vest is a very heavy, large vest that provides bicep, neck, groin, and torso coverage. This vest is primarily used for warrant and unscheduled SWAT calls. Although this vest provides maximum ballistic coverage, it is restrictive and retains heat during the summer months. The second style of vest has a plate carrier that holds ceramic plates in place and is designed to stop rifle rounds. This vest provides less protection but allows for more mobility.

The tactical carrier vests being purchased have a multi-platform modular design which allows the officers to change and adapt their vest with minimal effort and maximum efficiency. The officer will be able to configure their vest depending on their environment, threat, and operational requirement. The new vest has antimicrobial spacer mesh and padding which makes the vest breathable and much more comfortable during the summer heat while still having bicep, neck, groin, and torso coverage. The vest can also be scaled down to just the plate carrier if required.
